

Trimble and Digi Collaborate to Provide Fleets with Cold Chain Compliance Solution

February 20, 2019

Refrigerated Haulers Using Trimble Solutions Now Able to Implement SmartSense by Digi Trailer Tracking

SUNNYVALE, Calif., Feb. 20, 2019 /PRNewswire/ -- Trimble (NASDAQ: TRMB) today announced a collaboration with Digi International, a leading global provider of Internet of Things (IoT) connectivity products and services, to enable Trimble fleet customers to leverage the SmartSense by Digi® solution on their refrigerated trailers.

This fleet-focused initiative is part of both Trimble and Digi's effort to better connect all aspects of the supply chain. As part of these efforts, Trimble and Digi previously announced an integration of Digi's temperature monitoring data into Trimble's shipment visibility platform for shippers, third-party logistics providers and carriers.

With SmartSense by Digi, fleets in the food and beverage industry can quickly deploy remote monitoring to improve productivity, compliance and quality control. Designed to deliver real-time insight, SmartSense provides an efficient subscription-based service that continuously and wirelessly monitors task management activities and the temperature of perishable, high-value goods in different industries such as food services, healthcare, transportation and logistics or retail. Today, SmartSense systems enable real-time sensor-driven decisions at over 2,000 organizations in 75 countries.

"This collaboration gives our refrigerated fleet customers the opportunity to improve cold chain safety and compliance through SmartSense," said Adrian Harding, director of product strategy for Trimble's Transportation Division. "We recognize the market need for an integrated cold chain trailer tracking solution, and Digi and Trimble are working together to maximize our customers' safety, efficiency and visibility."

"The prevention of illness and potential contamination in foodservice, food monitoring, healthcare and pharmaceutical industries is obviously a top priority, but organizations can also see tremendous business benefit with automated cold chain safety solutions," said Kevin Riley, president of SmartSense by Digi.

About Digi International

Digi International (NASDAQ: DGII) is a leading global provider of business and mission-critical Internet of Things (IoT) and M2M products and services. We help our customers create next-generation connected products and deploy and manage critical communications infrastructures in demanding environments with high levels of security, relentless reliability and bulletproof performance. Founded in 1985, the company has helped its customers connect over 100 million things, and growing. For more information, visit Digi's website at www.digi.com, or call 877-912-3444 (U.S.) or 952-912-3444 (International).

About Trimble Transportation

Trimble Transportation is multi-modal and provides solutions for the long-haul trucking, field service management, rail and construction logistics industries to create a fully integrated supply chain. In trucking, Trimble provides enterprise and mobility solutions focused on business intelligence and data analytics; safety and regulatory compliance; navigation and routing; freight brokerage; supply chain visibility and final mile; transportation management and fleet maintenance. With an intelligent ecosystem of products and services, Trimble enables customers to embrace the rapid technological evolution of the industry and connect all aspects of transportation and logistics—trucks, drivers, back office, freight and assets. Through the combined legacy of ALK, PeopleNet, TMW Systems and 10-4 Systems, Trimble delivers an open, scalable platform to help customers make more informed decisions and maximize performance, visibility and safety. For more information about Trimble Transportation, visit: <https://www.trimble.com/transportation-logistics>.

About Trimble

Trimble is transforming the way the world works by delivering products and services that connect the physical and digital worlds. Core technologies in positioning, modeling, connectivity and data analytics enable customers to improve productivity, quality, safety and sustainability. From purpose built products to enterprise lifecycle solutions, Trimble software, hardware and services are transforming industries such as agriculture, construction, geospatial and transportation and logistics.
