

EKA Solutions Licenses Trimble's Mapping Web APIs to Deliver Enhanced ETA and Visibility Solutions

September 12, 2019

Trimble MAPS Development Platform Web APIs Enables EKA to Provide Real-Time Trip Management and Precise ETAs as Part of its Cloud-Based TMS Offerings

SUNNYVALE, Calif., Sept. 12, 2019 /PRNewswire/ -- Trimble (NASDAQ: TRMB) announced today that EKA Solutions, Inc., a provider of cloud-based transportation management system (TMS) solutions, has licensed web APIs from the Trimble MAPS development platform to deliver intelligent automated dispatch and real-time visibility solutions with interactive trip management tools for brokers, carriers and shippers.

Consisting of mapping, routing, navigation and location APIs, the Trimble MAPS development platform is specifically designed for solution providers and fleets looking to build or enhance commercial applications.

"EKA is excited to work with Trimble. The collaboration between Trimble and EKA will deliver transformative and affordable solutions to small- and medium-size broker, carrier and shipper businesses. It will empower them to provide a better experience for customers and drivers, while reducing the time, expense and effort of managing the business basics," said JJ Singh, founder, investor & CEO of EKA Solutions, Inc.

EKA has integrated trip management web APIs from the Trimble MAPS development platform to enhance its TMS Cloud. Through the Trimble MAPS stateful web services, trip data is stored on the server and used to continually monitor and manage the entire trip lifecycle, from planning through execution and analysis, resulting in highly accurate ETAs and the ability to visualize real-time trip progress.

"Creating a relationship with a solution provider who, similar to Trimble, is focused on enabling carriers, shippers and drivers to achieve operational success is extremely important to us," said Bill Maddox, business development for Trimble MAPS Division. "With increased carrier pressure to provide superior customer service and the shipper's need for freight visibility, we provide innovative tools to create or enhance applications that benefit the entire transportation workflow."

EKA's TMS solutions using the Trimble MAPS development platform are expected to be introduced and commercialized beginning as early as the third quarter of 2019.

About EKA

EKA Solutions, Inc., provides the Smart, Unified Platform EKA Omni- TMS® for - Virtually – Everyone. EKA Omni-TMS® is the cloud-based SaaS freight Eco-System designed to transform the transportation and logistics industry.
