

Steel fabrication management software suite Tekla PowerFab 2022 solves a common engineering problem with enhanced nesting and material management for splicing and splitting. With a streamlined system implementation, new customers can enjoy a smoother migration path from their previously used fabrication Management Information Solution (MIS) to Tekla PowerFab. This helps avoid tedious manual work and supports taking the new system into use with confidence, as the data from past projects is automatically saved, as required. The software also provides improved visibility and control with a new shipping calendar in the web-based Tekla PowerFab Go.

About Trimble Construction

Trimble is developing technology, software, and services that drive the digital transformation of construction with solutions that span the entire architecture, engineering, and construction (AEC) industry. Empowering teams across the construction lifecycle, Trimble's innovative approach improves coordination and collaboration between stakeholders, teams, phases, and processes. Trimble's Connected Construction strategy gives users control of their operations with best-in-class solutions and a common data environment. By automating work and transforming workflows, Trimble is enabling construction professionals to improve productivity, quality, transparency, safety, sustainability and deliver each project with confidence. For more information, visit: construction.trimble.com.

About Trimble

Trimble is an industrial technology company transforming the way the world works by delivering solutions that enable our customers to thrive. Core technologies in positioning, modeling, connectivity and data analytics connect the digital and physical worlds to improve productivity, quality, safety, transparency, and sustainability. From purpose-built products to enterprise lifecycle solutions, Trimble is transforming industries such as agriculture, construction, geospatial, and transportation. For more information about Trimble (NASDAQ:TRMB), visit: www.trimble.com.
